## Thank you for your interest in our products

Simply Control is a family business that has been designing and manufacturing our own controls and equipment for many years. Our products are designed to accurately and reliably maintain environments for growing.

Whether you want to heat a coldframe, water a hanging basket, reproduce a tropical rainforest in your greenhouse or cool your conservatory, we have the knowledge and equipment.

Create any environment you desire by intergrating our heating, lighting, humidity, irrigation and propagation equipment even remote control. We often provide bespoke solutions and are always adding new products to our range, so don't hesitate to ask.

Anyone wishing to collect an order in person is welcome to do so provided the order has been placed in advance and arrangements have been made for collection.

We have an excellent reputation for mail ordering worldwide and exhibit at various shows where we look forward to meeting new and existing customers.

## Servicing and repairs

We service and repair all our products to keep them in tip-top condition and working at maximum efficiency. Call and ask for details.

## Customisation

One of the many advantages of buying from Simply Control is that we can customise our products to match your exact requirements from adding extra length to mains or sensor cable, to automating your heating, cooling, watering or ventilation with our Thermostats, Transformer Water Controllers, Vent Openers or Humidistats. Discuss your needs with Jackie or Jimmy who has found solutions for hundreds of situations. We also move with the times and our products can be augmented by remote wireless technology, automation and even solar power.

Wireless / Remote / Solar Power Control solutions available

## Case study:

### The Victoria House, La Mortella.

La Mortella is a study centre for gifted young musicians in search of excellence in the performing arts with special reference to the music of the composer Sir William Walton.

The garden, designed by Russell Page, has an important collection of Mediterranean and tropical plants including a conservatory which houses the Victoria Water Lily, Orchids and Aroids.

The Bocca is the link between the garden and the music. In the thirties John Piper designed a front curtain for performances of William Walton's Facade entertainment to words by Edith Sitwell who recited her poems, using a megaphone, issuing from the large opening of the mouth. This curtain inspired Simon Verity's sculpture of the Bocca in the Victoria House.

Lady Walton opens the gardens of La Mortella to the public on Tuesdays, Thursdays, Saturdays & Sundays 09.00 to 19.00 from the 1st April to October. Every Saturday and Sunday there is a concert in the Recital Room by young musicians.

*"All the electronic controls of lighting, temperature, fog and rain systems used in the tropical house were bought from Simply Control by Mail Order. Mike Nash devised the correct installation and we could not be happier with the results as indeed the flourishing condition of the plants, growing in this mini rainforest demonstrate."*

**Susana Walton**

*"Hi everyone at Simply control. We are now back at school after the long vacation and the plants in our little garden have survived, indeed thrived ,thanks to your marvellous irrigation system. Loads of tomatoes, vegetables and flowers. Thankyou for all your help."*

**VB William Ellis School. (September 2009)**

## NEW Connect, Control, Monitor

If you want to control your watering, heating or lighting from your phone, we can integrate smart switching, scheduling, monitoring & recording. There is a vast range of connected solutions available to us depending on your individual requirements. From a single WiFi power adaptor that will allow you to switch, monitor and schedule for example your fogger to incorporating WiFi sensors that will control your fogger when the humidity drops, switch your heater off when the desired temperature is reached or turn on your growlights when it gets dark.

Let us know your requirements we will come up with a bespoke smart solution.

**Icon Key:** Icons are a guide to the possibilities available.

= Timed Control

= Temperature Control

= WiFi Control

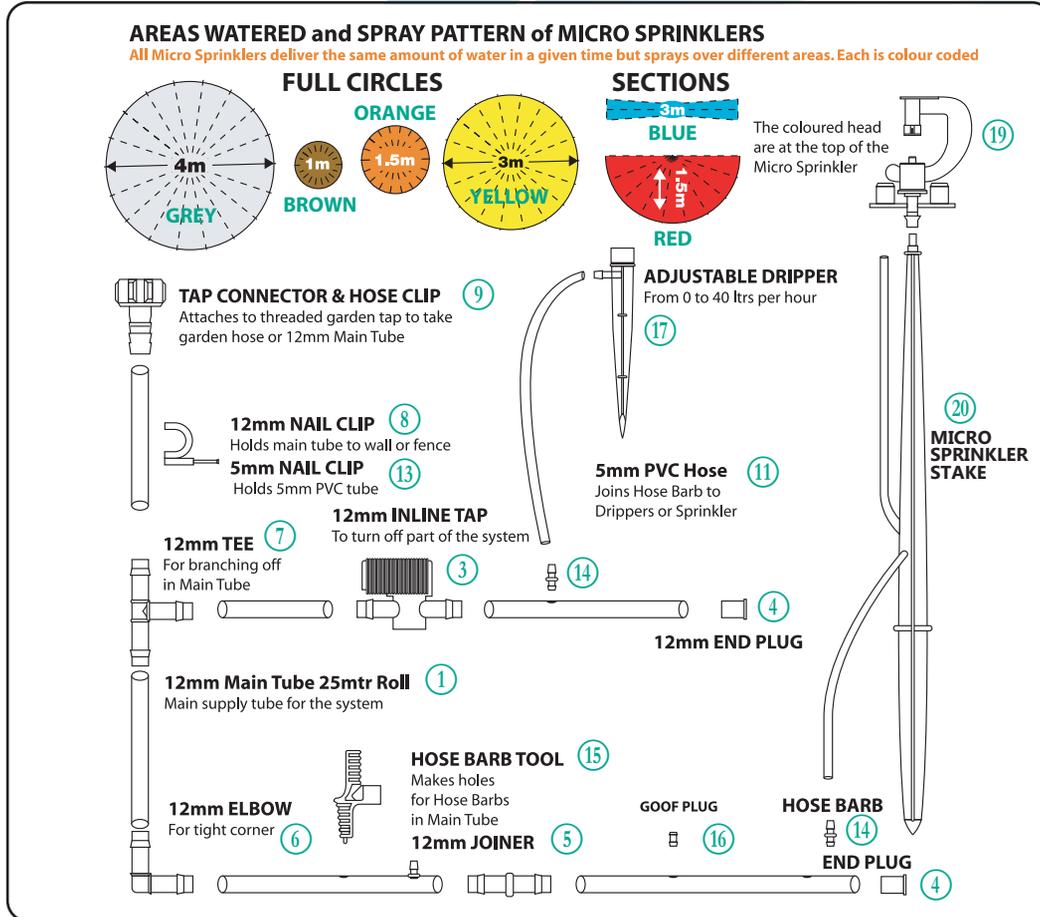

= Solar Power

## Areas watered and spray pattern of micro-sprinklers

Save 10% on watering orders over £50 excluding kits

All Micro Sprinklers deliver the same amount of water in a given time but sprays over different areas. Each is colour coded. The colour refers to the spray head on the top of each sprinkler.

"I've just installed your Micro Sprinkler. You have a No.1 product, I'm well impressed."  
 R.W. Norfolk

## Garden Watering System

### Our simple, easy and efficient D.I.Y. solution

"I'd like an automated watering system...So when we are away we don't have to rely on the neighbours." BUT, "It's too complicated," "I wouldn't know where to start:" "What would I want?" "Could I fit it?"

We have made it so easy, anyone can fit our system. We can supply all you require, you don't even need a screwdriver and definitely no plumbing knowledge.

If you're not confident to plan a complete watering system, one of our kits is the answer. Decide what you want to water, for Beds and Borders you need a Micro Sprinkler Kit. The Adjustable Dripper Kit is ideal for Baskets, Tubs and Pots. For Greenhouse watering see page 6.

Once you have installed your kit you can add any parts as and when you need then from our "Watering Bits and Pieces" (Page 3).

### How to install a Watering System Its easy as 1,2,3...

- Starting from the tap, screw on the Tap Connector. This will take the 12mm Main Tube supplied in 25 metre (82') coils and forms the backbone of the system. The tube is easily cut and bends round a 30cm (12") radius, if tighter use a 12mm Elbow. To go in two directions use a 12mm Tee. A 12mm Joiner connects another length of tube. An Inline Tap turns off part of the system. At the end of a run finish with a 12mm End Plug. These fittings just push into the special 12mm Main Tube which naturally grips the joint. Use 12mm Nail Clips to fix to fence or wall.
- To make an outlet for a Dripper or Sprinkler pierce a hole in the Main Tube with the Tool and push a Hose Barb in. The tubing closes round the Barb forming a water tight seal. A hole in the wrong place is sealed using a Goof Plug.
- A piece of 5mm PVC Hose is cut off the 10metre (33') roll and pushes onto the Hose Barb, then onto the Micro Sprinkler or Dripper. 5mm PVC if run up or down a wall or fence is fixed with 5mm Nail Clips. It could not be simpler.

"Thanks for the tip" C.C. November 2005

Micro Sprinkler Kit

### Simply Control Best Seller Micro Sprinkler Kit

Complete kit contains:  
For bed and border watering.

£64.95

- 15 Assorted Micro Sprinklers
- 15 Micro Sprinkler Stakes
- 25metres of 12mm Main Tube
- Tap Connector
- 12mm Elbow Joint
- 12mm Tube Joiner
- 12mm Tee Joiner
- 12mm End Plugs x 2
- 10metres of 5mm PVC Tube
- 15 Hose Barbs
- 5 Goof Plugs
- Hose Barb Tool
- Full, easy to follow Installation Instructions

Kits are easy to install and adapt as the planting changes. Far more efficient than an ordinary hose, as it delivers directly to the plant roots, reducing evaporation thereby allowing plants to thrive. The Kit with 15 assorted Micro Sprinklers is enough to water approx: 50' x 12' ( 600 sq.ft.) The tube can be laid on top or under the soil or can even be mulched over, (see Page 19).

"I use your micro sprinklers and I am impressed"  
S.H.

Micro Sprinkler Head: £1.95  
Micro Sprinkler Stake £1.95

Micro Sprinklers on 10" stakes are unobtrusive producing a rain like spray.

Automate any sprinkler or dripper system using our Transformer Water Controller (See Page 5)

## Simply Control Adjustable Drinker Kit

Complete kit contains:

- 15 x Adjustable Drippers
- Tap Connector
- 25metres - 12mm Main Tube
- 4 x 12mm Elbows
- 1 x 12mm Joiner
- 1 x 12mm Tee
- 2 x 12mm End Plugs
- 12mm Nail clips
- 20metres 5mm PVC Tube
- 5 x Goof Plugs (in case you make a mistake!)
- Hose Barb Tool
- 15 Hose barbs
- Full, easily understood instructions

£49.95

## Adjustable Drippers

Price each:

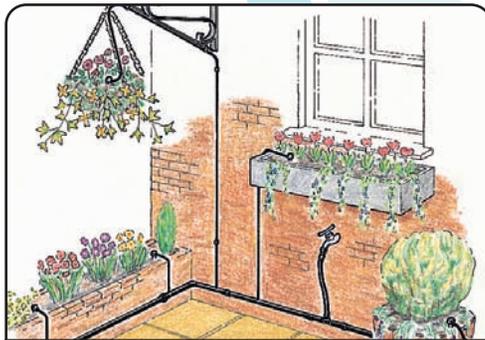

£1.15

### Using Adjustable Drippers

Each Drinker may be turned off, adjusted to a drip, a dribble or small spray independantly of any other Drinker.

The amount of water delivered to each plant is set depending upon its needs or the size of planter. Easy to fit. A 12mm main tube is run from the tap. The 5mm PVC tube is fed via hose barbs to the drippers. A garden tap will usually supply 30-40 Drippers.

Adjustable Drinker Kit for watering baskets, tubs and pots

## Watering Automation

### Simply Control Transformer Water Controller

With timer:

£79.95

Without timer:

£69.95

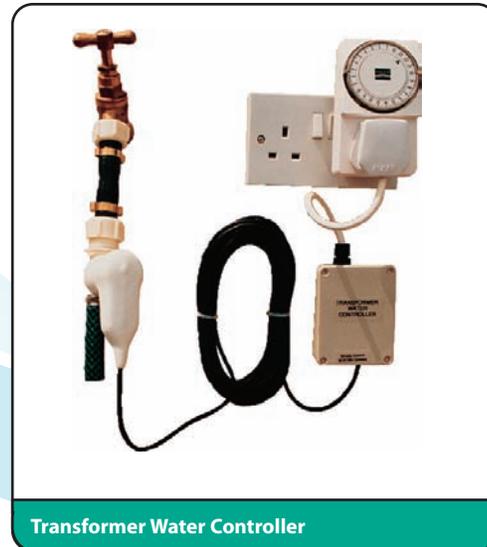

### Incredibly easy to operate, reliable Automatic Watering Controller.

A plug in timer and transformer are located in the dry and connected by a small, safe low voltage cable to our solenoid valve which is screwed onto the outside tap.

When the timer comes on the transformer sends a signal to the valve which opens and turns the water on for the time you have set.

This will operate a Sprinkler or Drinker System as many times a day as set on timeclock. Min: time 15 minutes. For shorter times use a digital timer.

- Transformer unit with 1metre mains cable and plug.
- Plug-in-timer
- 10 metres solenoid cable
- Solenoid and tap adaptor..

Transformer Water Controller

## Six Station Controller

Price each:

£229.00

When a system exceeds the amount of water available from one tap several systems are laid out as zones. The controller waters one zone, shuts that one off and moves onto the next. Up to 4 start times per day. Each zone independently set for 0-60 minutes. Fully auto.

Also available 4, 9 & 12 Station Controllers. P.O.A.

Each zone needs a 24V Solenoid Valve.

Six Station Controller, Manifold & Rain Sensor

## Rain Sensor

£35.95

Adjustable to 1/4" 1/2" 3/4" & 1" rainfall settings.

Hygrosopic discs absorb water to activate rain switch For use on all types of 24v controllers. Inc 30ft cable

## Simply Control Solenoid Valve

24v boxed:

£32.95

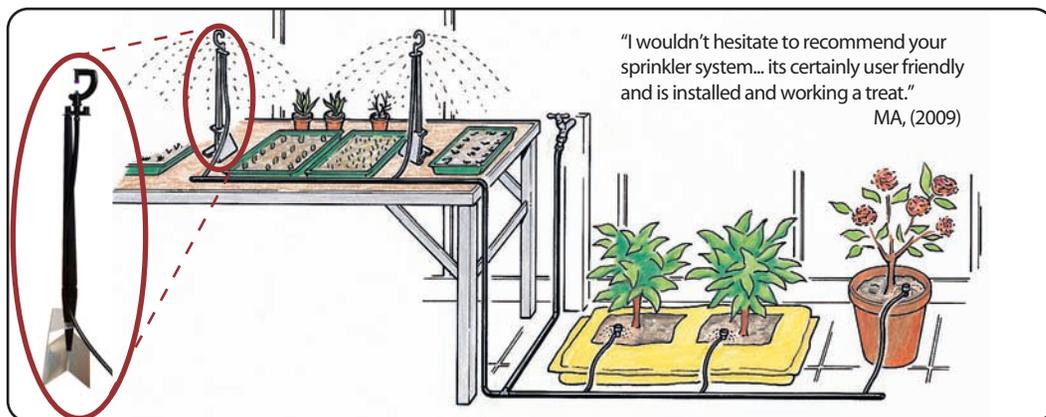

A 1/2" hose or 12mm main tube inlet/outlet valve which can be used to control a remote water supply any distance from the controller. Can be used with our Transformer Water Controller, Six Station Controller and our Humidification Systems.

## **NEW** Orbit Battery Water System

Price each:

£39.00

Watering duration from 1 - 240 minutes, every 6 - 12 hrs or from 1 - 7 days. Built in diaphragm valve for longer lasting and improved performance. 2xAA batteries required.

## Greenhouse Watering

### Simply Control Greenhouse Watering Kit

A simple adaptable kit: **£52.95**

All greenhouse plantings are catered for by this kit. A combination of Micro Mistlers which produce a mist like spray for pots and trays of seeds on the bench & Adjustable Drippers for growbags and tubs. The Kit enables you to alter positions of the Drippers & Mistlers as plantings alter. Enough for up to an average 12' x 8' greenhouse. For larger greenhouses extra Micro Mistlers and Drippers maybe added as required (page 2).

#### Kit contains:

- 12 Adjustable Drippers
- 25metres 12mm Main Tube
- 10metres 5mm PVC Tube
- 1 In-Line Tap
- Hose Barb Tool
- Full easy to follow installation instructions
- Goof Plugs & Fittings
- 3 Bench Stands
- 3 Micro Mistlers
- 15 Hose Barbs
- Tap Connector

"Other internet sites sell similar things, but you have excellent prices and products. You've a customer for life." D.L.

www.simplycontrol.com

## Self watering trays

**Waters by capillary action.** Fill the reservoir with water which is sucked up by the capillary matting supported by an inner platform. Just sit your plant pots on the matting to ensure they have a water supply.

Super: 20ltrs (4.5 gallon): **£29.95**  
60 x 60 x 7cm ( 23.5 x 23.5 x 2.75")

The 2' x 2' area allows a large group of plants to be watered. The large capacity will maintain most plants for at least a fortnight whilst you are away.

Windowsill: 3.4ltrs (3/4 gallon): **£18.95**  
76 x 17 x 3.5 cm ( 30 x 7 x 1 3/8")

Self watering trays

## Capillary matting **GREAT VALUE**

1 metre (3' 3") wide: **£4.60 per metre**  
60 cm (2') wide: **£3.40 per metre**

Our top quality commercial matting is the best way to water small pots. It is easily cut to size and washable for repeated use. The compost draws water up to the roots as plants require. Lifts water 75mm and holds 2 litres per metre. Use only flat bottomed pots with holes directly in the base. You don't have to have trays to use Capillary Matting. It will work on any flat surface. Water will not run off provided the matting does not overlap the side of the bench.

## Micro perforated polythene

1 metre wide: **£1.65 per metre**

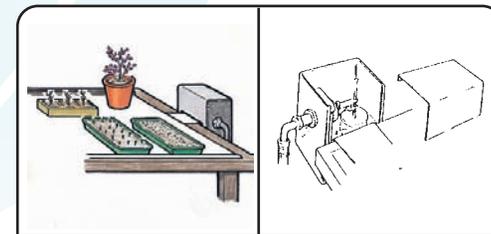

Laid on capillary matting to reduce algae and root growth onto the matting. Spillages easily cleaned up giving longer matting life. Cuts evaporation by 20 - 40%. 1metre wide (3'3") (Black).

## Ball valve tank

18 x 18 x 13cm (7" x 7" x 5"): **£29.95**

**Automation for capillary matting.**  
**No more dry benches**

Provides a constant water supply to keep capillary matting moist. This small tank is fitted with a float valve (like a tiny toilet cistern) maintaining a constant water level. The tank has a lip making it easy to fit onto the bench. Water is fed to the tank from the nearest tap by a hose. Capillary matting is fed by a wick (a small piece of the matting) laid into the tank and tucked under the matting on the bench.

Capillary matting

Ball valve tank

**3 & 2 Outlet Manifolds connect to Orbit Battery Water System** (see page 5)

## Manifolds

2 outlets: **£23.95**

3 outlets: **£33.95**

**Only one garden or greenhouse tap? Want to run a watering or mist system and a hose?**

Rather than the expense of adding extra taps use a manifold. Robust metal manifold screws straight onto the garden tap allowing two or three valved outlets. Each accepts standard threaded hose fitting, Klick tap adaptor or if automating a Sprinkler or Dripper System, the Transformer Water Controller.

## Water Waiter

**NEW**

Price pack of 3: **£6.75**

Fun self-watering system for house plants that is ideal for keeping plants watered when on holiday.

## Bottle Top Watering Spikes **NEW**

Price each: **£3.95**

Fit to a discarded plastic drinks bottle as a reservoir. Can be used indoors or outdoors. Ideal Holiday watering solution.

An average garden tap supplies 30 Drippers or Sprinklers.

**Gravel Trays & Water Waiter**

## Gravel Trays

Black, water-tight trays in 3 sizes. Ideal for gravel, clay granules or capillary matting to provide localised humidity to plants on them.

Massive 18ltr. Price each: **£14.95**

**SAVE 25%** 4 pack: **£44.95**

117 x 40 x 40cm (46 x 16 x 1.5")

Standard 12ltr. Price each: **£12.95**

**SAVE 25%** 4 pack: **£36.95**

79 x 40 x 4cm (31 x 16 x 1.5")

Square 25ltr. Price each: **£12.95**

**SAVE 25%** 4 pack: **£34.95**

61 x 61 x 7cm (24 x 24 x .75")

## Simply Control Tank Dripper Kit

**Ideal watering system when no mains water supply is available.**

As our Slow Drippers adjust to give a very slow drip no controller is needed. A water supply can be provided from a water butt, tank or our 15 litre collapsible tank complete with a connector ready to attach the hose for slow drippers. We provide a connector couple the tube to the tank. All you have to do is make a 1/2" hole.

Kit with 15ltr collapsible tank **£28.95**

Kit without tank **£22.95**

Kit contains:

- 10 x Slow Drippers
- 10 x Holders
- 10 x 5mm Tees
- Full, easy to follow instructions
- Hose Barb Tool
- Tank Connector
- 10 metres of 5mm hose

## Simply Control Slow Dripper Kit (Indoor)

**Off on holiday? Worried about watering house plants?**

This simple kit uses a plastic milk bottle or similar as a reservoir. The slow drippers, can deliver up to a litre an hour, but are adjustable to approx 1/2ltr a week.

Kit contains: **£4.95**

- 2 Slow Drippers
- 2 Holders
- 2 Hose Barbs
- 1 Tool
- 1 Metre of 5 mm Hose

## Extras

Extending your Slow Dripper or Tank Dripper Kit

Slow Drippers (10 Pack) **£7.95**

Hose 5mm PVC (10 metre Roll) **£5.95**

Tees 5mm (5 Pack) **£2.25**

Dripper Holders (10 Pack) **£0.95**

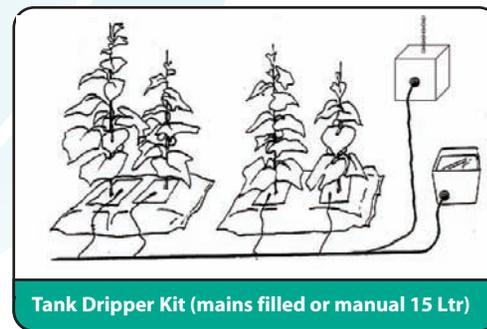

Tank Connector to 5mm Hose **£4.95**

**Torbec Valve** Price each: **£14.95**

A float valve makes a constant feed header tank for Slow Drippers fed from a garden hose. Torbec Valve & Hose Connector.

**15ltr Collapsible Tank** Price each: **£8.95**

Collapsible tank supplied with chain for hanging.

**Tank Dripper Kit (mains filled or manual 15 Ltr)**

## Pumps

### Lift Pump

Price each: **£65.00**

Small submersible useful for lifting from a butt or sunken tank. Outlet for garden hose. Also for fountains & waterfalls. Pumps 280gall: per hr: Up to 6'. Supplied with 10metres mains lead.

### Mist Pump

Price each: **£209.00**

60 psi 240V diaphragm pump. Suitable for use with Reverse Osmosis unit with rain or tap water to produce mist (page 17). Fine mist from rain or RO (page 9) water. Runs up to 10 mist nozzles (page 17). Will also run our Trigger Lance or a small watering system from a water butt.

### Pump set

Price each: **£P.O.A.**

Pump produces a supply similar to a mains tap from any RO or rain water tank. The tap or solenoid opens, the pump starts and maintains pressure.

### Garden pump set

Price each: **£P.O.A.**

Runs watering system or Hoses from Well up to 7metres deep stored or waste water from a Butt or tank. Supplied with Pump, 7metres Pick-Up Hose & Foot Valve.

## Hose Connections

We all know the plastic snap together hose systems. Our fittings are compatible with these, fit standard 1/2" hose but are engineered in brass for a long, trouble free life.

**Brass tap connector:** **£4.45**

Screws onto garden tap

**Brass hose connector:** **£6.25**

Connects hose to a tap connector

**Brass hose end:** **£7.25**

Connector with shut-off valve

**Brass tool adaptor:** **£3.25**

Threaded adaptor to sprinkler etc.

**Brass hose coupler:** **£3.65**

Connects two connectors together

Trigger Lance

### Trigger Lance

Price each: **£49.95**

(When ordering please state if more hose is required at £1.50 per metre).

Well balanced 50cm long, easy to control greenhouse lance. Handle with light pressure trigger.

Interchangeable nozzles can be used for watering or misting. Water is fed to the Lance by 5mm high pressure hose which is more flexible than standard 1/2" garden hose and less clumsy.

- Lance
- 3 Nozzles
- 4mtr Hose
- Tap Connector

If you want to pump water from a water butt or tank to use our Lance, Mist Pump or Pump Set are required.

## Sprayers

Trigger sprayer: 1/2ltr: **£7.25**  
1ltr: **£9.25**

Double action - when you pull the trigger it sprays but it also sprays when you release it. Nozzle adjustable from fine mist to a squirt.

Pump-up sprayer: 6ltr: **£59.95**

A pump up sprayer with hose, changeable nozzles and wand. For use with chemicals, weed killers etc.

## Water Treatments

Rain & Grey Water Treatment: 500ml: **£7.95**

Prevents scum, eliminates unpleasant odours and helps keep the water slime and algae free. Specially formulated to control soaps and body fats.

Algae & mould remover: 1ltr: **£7.95**

Harmless to plants, children, pets and pond life. Restores the natural look of stone, terracotta, greenhouse glass even polycarbonate.

Pump-up and Trigger Sprayers

## Water Purification and Treatments

Concerned about water quality? Calcium and nitrates? To produce virtually pure water use our Reverse Osmosis unit as used in desalination plants all over the world.

### Reverse Osmosis unit

Price each: **£144.00**  
Pure water for tropicals and exotics.

The membrane is designed for mains chlorinated water and does not need expensive pre-filters as with others. Removes 93% of impurities from tap water including calcium which leaves white deposits on plants. No electricity required. Mains water is fed from a hose tap. Pure water is collected in your container. Another hose goes to drain or onto the garden for watering.

- Membrane
- Housing
- Feed hose with tap connector
- Pure water and waste hoses

Reverse Osmosis system

### Replacement Reverse Osmosis membranes

Price each: **£97.50**

## Meters

Thermo-Hygrometer and Sensor Display Unit

### Thermo-Hygrometer

Price each: **£62.00**

A weatherproof sensor display unit is positioned in the greenhouse. This 'TALKS' to the main unit with large LCD display by wireless transfer upto 30 meters away. This displays temperature and relative humidity and updates every few seconds. Min & max temperatures in °C or °F. Range -50°C to +50°C from the unit. Internal sensor -20°C to +50°C and relative humidity 1% to 99%. Highest & lowest reading stored & displayed, reset anytime. Batteries not included will take upto 5 remote units

#### Alarm facility

Alarms can be set on the main unit to warn of high or low temperatures at the sensor unit. A MUST for Orchid & Tropical Growers.

### Sensor Display Unit

Price each: **£29.95**

Up to two Sensor Display Units can be added and information transmitted, and read on the original Main Unit.

Batteries included (2 x AAA).

*"I was given your number by RHS Wisely...The Thermometer has exceeded all my expectations, was very easy to install and is working well. I must congratulate you on your excellent product knowledge, helpfulness and efficiency."*  
Mrs. K.B.

Conductivity meter

Thermometers

### Conductivity Meter

1-1999  $\mu\text{s}/\text{cm}$ : **£125.00**

Waterproof meter. Simple calibration. Complete with batteries and calibration fluid sachets.

### pH Meter

0 to 14 pH: **£110.00**

Waterproof and floating case. Automatic calibration. Complete with batteries, battery life indication and calibration fluid sachets. This new unit has the added advantage of a replaceable pH electrode for longer life.

## Thermometers

### Max / Min Thermometer

Price each: **£12.95**

Highest and lowest temperatures recorded by markers moved by two mercury columns. Reset by push button.

### Traditional Thermometer

Price each: **£17.95**

Max-Min with re-set magnet. Robust design ideal for outdoor use.

### Soil Thermometer

Price each: **£10.95**

Monitors soil temperature in the propagator seed bed, compost & plant growing.

## Greenhouse controls: Temperature

Overwintering favourites from the garden requires the greenhouse or conservatory to be frost free, a minimum of 4°C. Exotics need higher temperatures.

Whatever the temperature, accurate control is essential for the plants but also your pocket. Every 1°C the house is overheated increases the fuel bill by 10%. Many thermostats allow wide swings. Some as much as 5°C. Also see Insulation on page 12.

### Simply Control Electronic Thermostat

BEST SELLER

Will control either heating or cooling

Price each:

£68.95

- **Accurate Temperature Control**  
Controls to within 1°C. Better for your plants and your pocket.
- **Temperature Ranges**  
0°C to 40°C. The temperature is set by the calibrated dial around the knob.
- **Remote Temperature Sensor**  
Sensor on 3metre lead is placed in the most vital position amongst your plants or in the sandbed giving more accurate control exactly where needed.
- **Splashproof**  
The electronics are housed in a simple to mount splashproof plastic box and the IP56 rating is maintained by cable entry glands with rubber seals.
- **Easy Installation**  
Easily wired to control either heating or cooling. In winter to accurately control heating and easily changed to run circulation or extract fans in the summer.
- **Very Versatile**  
Controls heaters up to 3Kw -13amps, soil warming cables in sand beds, tubular heaters, boilers or cooling equipment, extraction fans, circulation fans or electric vent openers. Use Relay Box for larger loads.

The Electronic Thermostat is a most popular horticultural thermostat. We are no longer surprised at the uses found for it. Candlemakers, Cheesemaking, Fish Farming, Ovens, Swimming Pools, Snakes, Aviaries all require accurate control. Size 156mm x 115mm x 75mm (4 $\frac{3}{4}$  x 6 $\frac{1}{4}$  x 3")

### Simply Control Tropical Thermostat

Day-night thermostat

Wired for our SC 3kw heater

£170.00

Wired for any 3rd party heater

£170.00

- **Automatic Temperature Reduction**  
Activated by the digital timeclock. The timeclock activates the electronics, the daytime set temperature is reduced by the degree drop required at night. Setable from 1°C to 10°C.
- **Accurate Control**  
Will control to within 1°C. Temperature is set on accurately marked dial 0°C to 40°C.
- **Remote Sensing**  
The sensor can be mounted up to 20metres from the controller. Standard sensor is supplied on 3metre lead. Extra lead supplied @ £1.25 per metre.
- **Higher Switching Capability**  
Switches up to 4kw 20amps resistive. Incorporates the requirements of both amateur & professional growers. Essential for specialist Exotic growers whose plants require a night time temperature drop to induce flowering, as happens naturally in the Tropics.

The Thermostat incorporates contact suppression for longer relay life and to improve EMC, a CE marking requirement when switching reactive loads.

Thermostat Size 156mm x 115mm x 75mm (4 $\frac{3}{4}$  x 6 $\frac{1}{4}$  x 3").  
Timeclock Size 85mm x 160mm x 120mm (3 $\frac{1}{4}$  x 6 $\frac{1}{4}$  x 4 $\frac{3}{4}$ ").

"I have had one of your Electronic Thermostats for about five years since when it has given me good service."  
J.H.

Simply Control Electronic Thermostat with remote sensor (3m lead)

### Relay Box

Price each:

£45.00

Heaters plugged in separate sockets can be controlled by one Thermostat or switches loads up to 20amps.

Simply Control Tropical Thermostat with Digital Timeclock and Pre-Wired sensor (3m lead)

Greenhouse controls: Heating

Greenhouse heating needs to vary with position, draught proofing and insulation. Generally 3kW will keep a 10' x 12' frost free when -7°C outside. By installing Bubble Insulation the same heater will give higher temperatures, lower running costs or heat a larger greenhouse.

“Electric heaters are the most adaptable source of heating for smaller greenhouses and the most efficient means of maintaining specified temperatures. Thermostatic control ensures no wastage of heat resulting from changing external conditions. There are no fumes and no need for ventilation when the heaters are in use. Use of off-peak electricity, with an appropriate meter, will reduce running costs” RHS Website

Simply Control 3kW Fan Heater

- With thermostat: **GREAT VALUE** £205.00
- Without thermostat: £189.00
- With Tropical Thermostat: **NEW** £350.00

**i** Designed & manufactured by us especially for high humidity greenhouse use

- **Stainless Steel Case**  
For longlife. 265 x 305 x 240mm (9" dia x 12" long x 9 1/2" high).
- **Accurate Temperature**  
Built in Electronic Thermostat. (See page 10)
- **Dual Sheathed Elements**  
Not affected by high humidities. Provides 3kw. (Elements cut in providing heat as required.)
- **Large Fan 7.5"**  
Provides quick, even heat distribution 320c.m.h. Switchable for summer air circulation or to run constantly. Reducing cold spots & running costs.
- **Remote Temperature Sensor**  
The temperature sensor (on 3 metre lead) placed amongst the plants maintains the correct temperature for them, not the irrelevant heater temperature. Customise Length of Sensor Lead @ 95p per extra metre

Simply Control 3kW Fan Heater with Stat

- Tube Heater** **NEW**
- 3' – 180W tube heater: **£39.95** **£108.90**
  - 4' – 240W tube heater: **£44.95** **£113.90**
  - 6' – 360W tube heater: **£54.95** **£123.90**

Ideal for under bench or keeping a cold frame frost free. 60 watts per ft. May be mounted one above the other. Includes mounting brackets. Can be pre wired to our Electronic Thermostat.

**i** Electric heating is accurately controlled, produces no condensation and does not need outside ventilation.

**i** Accurate temperature control of tubes, heated tray or other heating by our Electronic Thermostat saves electricity and allows you to leave your plants without worry.

Simply Control Heated Tray

- SC Heated Tray** **NEW**
- Price each **No Stat** **With Stat**  
**£59.95** **£128.00**

A flat aluminium surface encloses a bonded heating element and insulating polystyrene ensuring all the heat is dispated upwards, providing even bottom heat to encourage seed germination and root growth. Easily stored when not in use. Will raise the surface temperature. 12°C - 20°C above ambient temperature. Tray Size: 100 x 38cm (3'3" x 15")

**i** Heated Trays & Fan Heaters come complete with 3 metres (9'9") Mains Lead & Plug. Customise length on request @ £2 per extra metre

**Contact us...**  
Tel: 01796 482 128 Fax: 01796 482 111  
www.simplycontrol.com  
Simply Control, 5 Sawmill Yard, Blair Atholl, Perthshire, PH18 5TL

**Awarded 5 Stars in The Times Greenhouse Heater Survey**

**NEW** Blend your equipment into the background with wrapping:- Green, Brown or White. **£P.O.A.**

## Insulation

The most cost effective greenhouse insulation. Large Cell Bubble can cut heating bills by 50%

Bubble Insulation

### Bubble Insulation **GREAT VALUE**

Per Metre (1.5 Metre wide): **£2.55**

Per Metre (1.25 Metre wide): **NEW £1.70**

**i** Insulation Bubble is NOT packing bubble. They are totally different products

- **Top Quality** Commercial 25mm laminated cells.
- **Higher Insulation value** Reduces heat loss and heating costs.
- **Good Light Transmission** Allows more light to plants.
- **Diffused Light** Sunlight refracting off the deep cell walls reduces plant scorch.
- **Ultra Violet Stabilised** Reduces the destructive effects of sunrays, gives longer life. Many growers leave up all year.

N.B. P&P for Bubble Insulation will be charged at a flat rate of £5.95 up to 6.4 meters (21 feet). Price on application for greater quantities.

To work out length required - also easiest neatest way to fit. Use the 1.5metre (5ft) roll width as the height. Unroll the long length down the greenhouse from end to end. Often from ridge to eave & eave to ground is about 5ft. This stops draughty joins and makes it easy to seal with Clear Tape

GUIDE	6' x 8' house	15metres
	10' x 8' house	20metres
	8' x 12' house	25metres

"Temporary insulation by lining glasshouses with Bubble poythene can significantly reduce heat loss." RHS Website

## Shading

Shading outside effectively reduces internal temperatures.

Shadenet

### Shadenet **BEST SELLER**

per Metre (1.5 Metre wide): **£3.40**

Laid over the greenhouse, Shadenet is a simple cost effective way of providing shade to reduce temperatures. Top quality, strong woven green 45% shading with eyelets for fixing cord to ground pegs or weights. Shadenet fitted inside prevents plant scorch but won't reduce temperatures.

## Fixings

### Twist Clips for Aluminium Greenhouses

Pack of 50 **£4.75**

Plastic clips for securing insulation, Shading, wires etc.

### Clear Tape

25 Metres (80ft) **£6.95**

Waterproof adhesive 2" wide tape joins section of Bubble Insulation preventing draughts, also repairs glass, polythene, many other uses.

### Wood Pins for Wooden Greenhouses

Pack of 20 **£4.75**

Plastic clips for securing Insulation, Shading, Wires etc.

## Aluminium Shading **BEST SELLER**

per Sq Metre: **£9.50**

Aluminium Shading

- **For external use.** Longlife woven nylon netting with aluminium stripes and gaps. The aluminium reflects the sunlight, reducing internal temperatures. The gaps producing a dappled shade. The white material inside reflects light around.
- **Available in three shading levels from 50 to 70%.** 50% is the most commonly used. Supplied in any length to the nearest half metre. The stripe runs the length of the greenhouse or conservatory. Available in two widths 2.1 or 4.2 metres which lies from ridge to gutter or ridge to bench.

The best shading we've found. Reduces temperatures but maintains good light levels. Call us for quotation. Also suitable for conservatories.

## Vent Opening

Automatic Louvre Opener

## Louvre Opener **NEW £28.95**

This unit, designed for automatic louvre control, fits within the frame size of the louvre.

## Vent Opening

Automatic ventilation gives stable temperatures. As a guide you need a quarter of the floor area in opening vents.

Wax operated Vent Openers

Wax operated Vent Openers, the hotter it gets the wider they open. Adjustable to start opening anywhere between 12° - 25°C.

### XL

Price each:

**BEST SELLER**

**£22.95**

A simple yet rugged, inexpensive Vent Opener which can lift 22lbs/10kg. Clamps to aluminium greenhouses, or screws into timber.

### MK7 Triple Spring

Price each:

**GREAT VALUE**

**£39.95**

For heavier roof vents or top hinged side opening windows. Prevents flutter in exposed greenhouses. Lifts up to 26lbs/12kg - 36" x 24". Anodised Aluminium vent.

### MK7 (High Temperature)

Price each:

**£45.95**

For use in Orchid and Tropical houses. Setable to start opening between 25°C and 35°C. Stops the problem of vents being open and the heater still being on.

"The MK7 Triple Spring Vent Opener works very well, so I am ordering another" Dr. GB

## Electrical Openers

More responsive to changing conditions.

### Conservatory Vent Motor

Price each: **£257.00**

Virtually silent electrically operated, similar to a hydraulic ram, lifts 45 kilos. Ideal for heavy double glazed roof lights. One motor per vent.

Vent Openers are ideal for cooling conservatories in the summer

### Vent Motor Controller

Price each:

**£219.00**

Stops temperature fluctuations when using Conservatory motor. Controller can operate multiple vent motors simultaneously.

Effectively the Vent Motor Controller is our Electronic Thermostat and Burst Timer prewired. As temperature rises, the thermostat activates the burst timer. The window opens slightly, then waits before opening further, continuing until wide open. As the temperature drops, the vent closes in one go. Both opening times and wait times are independently set. Supplied with Thermostat & Burst Timer pre-wired.

## Extractor Fan Ventilation

### NEW Simply Control Stainless Steel Fan

Price each:

**£234.00**

Our own stainless steel fan made specifically for greenhouses. The fan will extract 1,200 cubic metres of air per hour with its 18 watt motor. Reducing temperatures quickly and efficiently. Lightweight aluminium louvers prevent back draft when fan is off for greenhouses up to 10'x 15' to give approximately 50 air changes per hour.

Simply Control Stainless Steel Fan

All extractor and circulation fans can be controlled by Simply Control's Electronic Thermostat.

### Plastic Fans and Smaller Fans

9" Extractor fan:

**£P.O.A**

A well proven plastic fan. All fans; window or wall mounted are 240V AC with automatic shutters, preventing heat loss and drafts when fan is off.

Specifications	9"	12" S. Steel
Extracts Cu: Metres Per Hour	620	1200
Hole Diameter (mm)	257/262	333/337
Overall Size Square (mm)	291	375
Greenhouse Size (approx.)	10 x 6	15 x 10

## Air circulation

On a still day air is moving a metre per second in the natural habitat. Fans create air movement, reducing plant disease, damping off and provide a more even temperature and thus healthier plants.

### Simply Control 4" Circulation Fan 4" (165 x 115mm) 4.5" diameter x 6.5": £62.00

Plastic case, splash resistant, double insulated and moves 80 cu: metres per hour. Ideal over seed beds and amongst plantings. Wrapped in metallic green.

### Simply Control 9" Circulation Fan 9" (305 x 230mm) 9" diameter x 12": £114.95

Gives a gentle breeze in the greenhouse. Stainless steel case, hanging chain and circulates 415 cubic metres of air per hour.

9" & 4" Air circulation fans

"A fan to distribute heat may be necessary to avoid overheating some areas and underheating others"  
RHS Website

"Goods ordered yesterday delivered here this morning. Excellent service, many thanks."  
MA (2012)

## Lighting

Lack of light produces weak spindly plants. Supplementary lighting with correct balance between the blue & red ends of the spectrum, promotes healthy, vigorous growth.

### Growlight 160 (with Bulb)

Per item: £64.95

Supplementary plant lighting for greenhouse, conservatory or house plants. Boosts natural light or extends day length. Ideal for taller plants. 160watt mercury blended bulb & aluminium reflector & 0.5metres chain. Suspended at 3' provides 3'6" dia: growing area. Costs 3p per hr to run.

Replacement bulb: £22.95

Growlight 160

NEW - We have experimental Red LED lights that have proven in initial tests to increase growth rate and size significantly. Please contact us for more information.

### Light Fitting (excludes tube)

4' single light fitting: £54.95  
4' twin light fitting: £84.95

Ideal in damp environments. Waterproof to IP65 GRP case with clip on polycarbonate diffuser. For use either as a general working light in the greenhouse or to have Gro-Lux Tubes which when positioned close to seedings boost growth and reduce "leggyness". Supplied with 0.5metres chain. Takes 1" dia: fluorescent or Grow-Lux tubes (not inc).

Single light fitting

### Grow-Lux 36 Watt tubes

4' Grow-Lux tube: £19.95

Boosts growth by providing the correct spectrum for the plants encouraging growth and healthier plants.

Red LED Growlight

Red LED Growlight **NEW**  
Per Light: £99.00

## Greenhouse Electrical

The greenhouse should be wired by an electrician with the cable sized correctly dependent on the distance & the load and a Residual Current Device (RCD) fitted.

### Simply Controls Board

Price each: **£37.00**

A varnished exterior Plywood panel 19" x 24" provides a neat mounting for greenhouse controls and electrics. Clever slotted aluminium brackets and bolt pack enable it to be easily mounted between aluminium or timber glazing bars, that are between 22" to 30" apart.

### Sockets and Housing

Price each: **£48.95**

Provides 4 sockets

A safer way to provide power for controls, propagators, lights plug in timers etc. enables plugs to be splash resistant and out of the way even when unplugged. Aluminium case, removable clear plastic front panel, four square pin outlets, neon indicator, fuse & switch. Total Max load 13amps. 16" x 7.5" x 5".

### R.C.D. 25 Amp or 40 Amp

Price each: **£76.95**

If a fault occurs the supply is shut off, giving protection from electrocution. A 30 milliamp trip in a splashproof box. Size 74 x 135 x 95mm.

### Hoseproof Socket

Price each: **£39.95**

A clever rubber seal enables a standard square pin plug to be waterproof to IP56 when plugged in and the lid closed.

Fitted with R.C.D., Sockets and Housing.

**"Just to say thanks for your swift service. I ordered on-line on Wednesday 20:48, it arrived Friday. Amazingly Quick."**

Mr JTS (Feb 2005)

#### SATISFACTION GUARANTEED

If you are not completely satisfied products returned in an unused condition within 14 days are fully refunded (less postage and packaging).

## Timeclocks

### Plug-in Timeclock (Analogue)

Price each: **£16.95**

24 hour plug in analogue timer, 15 minute intervals 13amps. As supplied with our Transformer Water Controller with Timer. Fits in our Sockets & Housing.

### Digital Plug-in Timer

Price each: **£27.95**

The Digital timer runs 24 hours and 7 days allowing daily or weekly programmes to be set. Push button settings with six 'ons' and six 'offs' per day. Minimum setting time 1 minute. A very flexible and useful timer in the greenhouse to control either humidity or watering systems when short periods are needed. Fits in our sockets and housing.

### Simply Control Splashproof Timer

Price each: **£64.00**

A digital timeclock in a splashproof box, will control in 1 min intervals over 8 time ranges. Will switch upto 16amps For Growlights, pumps, solenoids, garden lighting etc.

### Simply Control Burst Timer

Price each: **£119.00**

Our Burst Timer provides a short burst of spray followed by a wait period. Both spray and wait times are settable from 1 second to many hours. Added to our plume spray system this reduces wetting and improves control.

Digital WiFi Timeclocks Now Available **NEW**

Timeclocks can be used to control Humidifiers, Growlights and Garden Lighting.

## Soil Warming and Propagators

Bottom heat provided by a Propagator or Soil Warming Cable improves germination of seedlings and rooting of cuttings by promoting healthy, vigorous root growth.

### Soil Warming Cables **GREAT VALUE**

To make a Propagator to fit the space available. Make a wooden frame about 4" high with a base (like a drawer). Put a piece of 1" polystyrene covered in polythene in the base, lay the cable on it and cover with approx: 1.5" of coarse sand. Our Cables are Superior Quality, Fully Insulated with Safety Earth Braid. You will need 7.5watts per square foot in a heated greenhouse. 10 watts if unheated.

Cable	Watts	Area @ 10watts per Sq:ft	Price
20ft	75	7.5 sq:ft (2'6" x 3')	£32.95
40ft	150	15 sq:ft (2'6" x 6')	£44.95
80ft	300	30 sq:ft (3' x 10')	£69.95

A Mist Bed requires 16 watts per square foot so double the cable length for area. Accurate control is by our Thermostat. If purchasing a Thermostat and Cable we are happy to pre-wire them with 3metres mains cable & plug, please add £9.50. If you need help please contact us.

## Windowsill Propagator

Price each: **£39.95**

7 Mini seed trays with clear plastic lids enable a larger variety of seed to be propagated in a confined area. The 15 watt electrically heated base 30 x 7.25 x 4.5" An ideal present for the keen gardener.

## Simply Control Propagation Tray

Price each: **£139.00**

Our own Propagation Tray 39 x 15" takes four Full sized seed trays. Lightweight, easy to store when not in use. The aluminium tray provides evenly distributed bottom heat from the 60watt element. Accurately controlled by our Electronic Thermostat.

An ideal base to provide heat when over wintering. Supplied as Tray and pre-wired Thermostat.

Now includes 4 full size seedtrays and high top covers. As reviewed in Gardening Which?

"It was very refreshing to find a company, which still has the ethics of service to its customers, so very much in evidence."

G.M.W. Hampshire,

Potting Tidy and Plant Labels

## Potting Tidy

Price each: **£17.95**

Tough plastic tray makes potting a pleasure. No mess and compost always to hand. 24" x 21 1/2" x 8" high.

## Plant Labels

5" pack of 25: **£2.25**

Useful for different species etc:

State colour. White - Green - Yellow - Red

## Label Pen

Price each: **£2.25**

Permanent, write on anything.

## High Top Covers

Price for 4: **£22.95**

As supplied with our Propagation Tray.

Rigid clear plastic 7" (180mm) seed tray covers providing plenty of growing room. Two adjustable vents.

## 6" Propagator Thermometer

6" thermometer: **£6.95**

Monitors soil temperature in the propagator seed bed or compost.

## Seed Trays

Price for 4: **£7.95**

Strong black plastic seed trays. Base holes for capillary matting. 14.5" x 9" x 2.25"

## Mist Propagation

**Mist and bottom heat gives greater success when rooting cuttings, some impossible without. Quicker rooting produces healthier plants.**

### Simply Control Misty Controller

Price each:   **£209.00**

**Automatic Mist Propagation designed for professional and amateur grower creating the best environment for rooting cuttings.**

You need electricity and mains or pumped water and a Bench or Overhead Mist System.

The leaf sensor regulates the frequency of mist. Once evaporation breaks the circuit on the leaf sensor the solenoid valve opens and misting starts, continuing for 1 to 30 seconds (setable) controlling the wetness of the crop from each misting.

Leaf sensitivity adjusts the amount the leaf sensor dries before misting again. The combination of the two settings gives infinitely variable control. The unit can be switched to continuous mist and from burst time in seconds to minutes enabling it to be used for watering.

Misty pre-wired, mains plug, Leaf Sensor & 24V Solenoid Valve all on 3metres cable. Tap Connector. Size 170 x 80 x 65mm. (4<sup>3</sup>/<sub>4</sub> x 6<sup>1</sup>/<sub>4</sub> x 3")

**Misty Controller with Mist Nozzle on stand**

## Mist Nozzle on Stand

Price each: **£27.95**

Supplied with 2metres High Pressure Hose, Clip and Adaptor to garden hose. Covers 3" diagonal of bench. Mist Nozzle, fitted with filter and mounted on a stainless steel stand.

### Extra Nozzles

Price each: **£22.95**

Nozzle and stand covers a further 1metre. 2 metres of high pressure hose, tee & clips.

**Overhead mister, starter module**

### Overhead Mister, Starter Module

Price each: **£48.95**

Mist covers a 3ft x 6ft area. Consists of two nozzles, 15mm rigid pipework, hose connection, wire hangers, push fit fittings for easy disconnection if changing layout or adding extra nozzles.

### Extra Module

Price each: **£27.95**

Covers a further 3ft. Includes nozzle, pipework & fittings.

### Mist Nozzle

Price each: **£18.95**

75 Modern commercial Nozzle. For replacement of old brass type. UV stabilized plastic, stainless steel jet & anvil, mesh filter. 1/2" BSP male thread. At 50 psi. 0.6mm JET 3' dia: uses 0.42 ltrs per minute.

### Mist Pump

Price each: **£209.00**

60 psi 240V diaphragm pump. Will run a Mist System producing a fine mist from rain water butt or RO (page 9) water tank. Runs up to 10 mist nozzles. Will also run our Trigger Lance (page 8) or a small watering system from a water butt.

C.D. Cyprus, November 2005

## Humidification

"...the fogger is up and running doing all I wanted of it, thanks for all of your info and help. I am really glad I did not waste money and go elsewhere."  
BVS (2010)

Most plants benefit from a humid atmosphere reducing moisture loss. Humidity is usually achieved by damping down, which is a bit hit and miss.

### Plume Spray Nozzle

Price each: **£19.95**

#### For Humidification or Evaporative Cooling

Produces a cross between Mist and Fog, using mains water pressure. Some particles fall to the ground and evaporate naturally. Many are so small that they evaporate before reaching the floor and are burnt off directly increasing humidity. One nozzle per 6ft x 8ft greenhouse.

Comes with 2 metres of 5mm H.P. hose, Tee and 5 Hose Clips.

### Simply Control Humidistat

Price each: **£154.00**

Low Voltage Humidistat with Solenoid Valve OR 240v Relay for Humidifiers.

**i Automates existing systems**

### Simply Control Burst Timer

Price each: **£119.00**

Our Burst Timer provides a short burst of spray followed by a wait period. Both spray and wait times are settable from 1 second to many hours. Added to our plume sprays this reduces wetting and improves control.

#### Humidification Extras (High Pressure)

- 5mm HP Hose (per meter): £2.25
- 5mm Tees (5 pack): £2.75
- 5mm Hose Clips (5 pack): £2.75

#### Contact us...

Tel: 01796 482 128 Fax: 01796 482 111

[www.simplycontrol.com](http://www.simplycontrol.com)

Simply Control, 5 Sawmill Yard, Blair Atholl, Perthshire, PH18 5TL

### Simply Control Humidification Kit

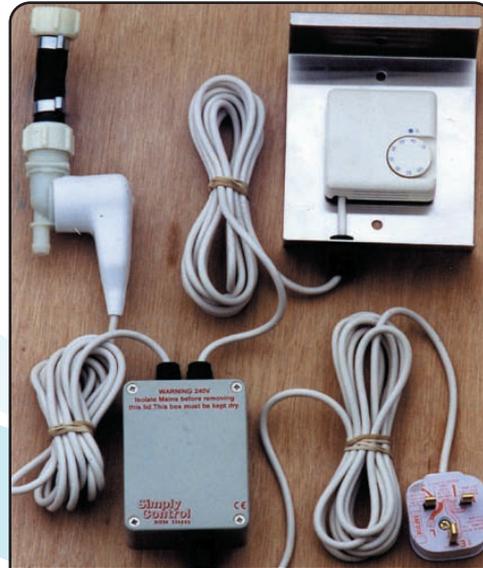

Price each: **£192.00**

Moisture (finer than mist) in the air is provided by our plume spray nozzles using mains water pressure. Sprays are usually positioned at high level in the greenhouse to spray into a gangway.

The transformer provides safe low voltage for the Humidistat Controller. This can be mounted in the greenhouse and is wired using low voltage cable.

The solenoid is triggered by the Humidistat when the humidity is below that set. Settable from 30 to 95% RH. The Solenoid Valve is supplied with Tap Adaptor which connects to a threaded hose tap or one of our Manifolds.

- Pre-wired 3 metres of cable to Transformer
- Humidistat & Mounting Bracket
- Solenoid Valve
- 2 Plume Spray Nozzles
- 4 metres Hose
- 5 Clips & Adaptor.

Humidification Kit

Hydrofogger 400

Ultra Sonic Atomiser

### Ultra-sonic atomiser

Price each: **£39.95**

The single 2" diameter plate provides humidity to a Wardian Case or Terrarium but also produces a lovely swirling mist effect amongst a "group" of plants in the house, greenhouse or water feature.

Plug in Transformer, 1.5 metre lead.

### Mist Maker with Floation Chamber

Price each: **£105.00**

This 3 plate atomiser produces humidity for a 6 x 8 greenhouse when placed in a water butt. Can also be decorative in a water feature or pond. Floation chamber ensures correct depth.

### Hydrofoggers

The ultimate way of producing real rain forest or cloud conditions for Orchids and Tropicals.

Reduces summer temperatures in greenhouses and conservatories. Connect directly to mains water, RO(p9) or rainwater tank. Controlled by our Humidistat or Timeclock (p15) Supplied with 3 metres Hose and Tap Connector and 1/2 metre mains lead with plug.

**Hydrofogger 400 with Humidistat** **NEW** **£499.00**  
**£529.00**

Converts 8 litres of water to fog per hour and provide humidity for upto 400 sq.ft. Dimensions: 14" Dia x 14" H.

**Hydrofogger 240 with Humidistat** **Best Seller** **£299.00**  
**NEW** **£329.00**

The perfect Hydrofogger for the smaller greenhouse. Converts 3 litres of water to fog per hour providing humidity for upto 240 sq.ft. Dimensions 12" Dia x 12" H.

## Ties, Supports and Useful Extras

### Useful Extras

**Cropped head bolts & nuts (10 pack): £2.75**  
Slot in aluminium glazing bars for fixing accessories.

**Cropped head bolts & nuts with rings (Pk 5): £ 3.10**  
For suspending hanging baskets or wires.

**"S" Hooks (5 pack): £2.45**  
1" zinc plated for hanging baskets and fans.

**"W" Wire Glazing Clips (30 pack): £2.95**  
Holds glass in glazing bars.

**Lap clips (25 pack): £2.50**  
Holds two overlapping panes of glass.

**Fleece (1.5m wide x 10m): £9.95**  
Lightweight, strong white fleece. Laid over plants or seedlings provides a micro climate. Accelerates growth by increasing soil temperatures, allows air & water through. Protects from frost, birds etc.

**Mulch (1.5m / 5' wide) 10m pack: £9.95**  
Made from black spunbonded polypropylene with UV stabiliser. A barrier to weeds, enables planting through easily cut cross holes. Ideal for mulching strawberry beds, greenhouse floor or with pea shingle on top for pathways.

**Mulch (1.5m / 5' wide) 10m pack: £9.95**  
Made from black spunbonded polypropylene with UV stabiliser. A barrier to weeds, enables planting through easily cut cross holes. Ideal for mulching strawberry beds, greenhouse floor or with pea shingle on top for pathways.

**Mulch (1.5m / 5' wide) 10m pack: £9.95**  
Made from black spunbonded polypropylene with UV stabiliser. A barrier to weeds, enables planting through easily cut cross holes. Ideal for mulching strawberry beds, greenhouse floor or with pea shingle on top for pathways.

**Slug traps (2 Pack): £8.95**  
Designed to blend in with the garden this reusable trap is easy to use. Simply add a small quantity of beer to attract slugs and snails.

**Yellow fly-papers (10 pack): £7.25**  
Sticky double sided traps. Biological control of greenhouse flying pests. Aphids, whitefly, thrips etc. 3" x 12" (70 x 320mm).

**NEW - Rubber Mulch made from recycled tyres in various colours. Heavier than traditional bark mulch, rubber mulch does not require regular replenishment, and can be cleaned. Contact us for details.**

### Ties and supports

**Vine Eyes (10 pack): £3.50**  
75mm (3") Screw in zinc plated Vine Eyes for attaching straining wires.

**Zip Ties (20 pack): £2.25**  
2.5mm ( 1/8") x 100mm (4") Green plastic ratchet tie. Quick & simple method of attaching to line wires, joining windbreaks & shadenet.

**Plant support rings (2 pack): £2.25**  
A convenient way to support plant stems from a cane. Once the ring has been slid onto the cane the stems can be put into any of the three sections by springing the outer circle apart which then springs back into place.

**Cane Caps (8 pack): £2.50**  
Safety caps for standard bamboo garden canes.

**Split Cane Caps (10 pack): £1.25**  
Safety caps for green split canes. Ideal in the greenhouse and conservatory.

**Green Jute Twine (500g ball): £5.95**  
Large Ball general purpose garden twine.

**Garden Bags (5): £4.95**  
400mm (16") W x 1metre (40") Tall Thick green polythene bags. Ideal for making own grow bags, collecting garden-house rubbish etc.

**Split Canes 24" (20 pack): £2.25**  
Traditional green split canes for flower, pot plant support.

**Bottle Top Waterers (2 pack): £2.50**  
They say the simplest ideas are the best and this is certainly one of them. Fits the top of any plastic drinks bottle giving gentle, accurate spray watering for seedlings and pot plants.

## Growmate Controls and Accessories

We have been developing heating and watering kits especially for Growmate for several years enabling Growmate gardeners to get even more from their growmates.

**Bubble Insulation Kit: £24.95**

Large cell Bubble Insulation, cut to shape in one piece. Included are special fixings which simply clip over the Bubble and glazing bars on the outside for easy fitting and removal.

**Tubular Heater Kit - Thermostatically Controlled: £110.00**

Air heating can be provided by a 3' Tubular heater mounted across the base at low level. The mounting brackets slip over the spokes and hold the heater and thermostat just below the lower shelf height. This is the most economical method of heating with the advantage of total automatic control.

Kit contains: Tubular Heater, Mounting Brackets, Thermostat & 3 metres of Main Lead with plug.

**Watering Kit: £34.00**

Trial and error has proved that the most versatile watering solution is provided by Adjustable Drippers inserted into pots. Each individual dripper can be turned off, or adjusted from a tiny drop to a dribble, or even a spray. When used on full spray a single dripper can be positioned to water a group of plants.

Kit contains: Main Tubing, Pressure reducer, All sundry fittings, tool and instructions.

**Automated Watering:**

**Transformer Water Controller with Timer: £74.95**  
**Transformer Water Controller without Timer: £69.95**

When the timer comes on the transformer sends a signal to open the valve and release the water.

### Gift Voucher

**Want to buy something for your husband, wife, friend or relative but are not sure what? Simply Control Gift Vouchers are available for any value over £10, and are the perfect solution.**

## Testimonials

**"Like the web site very user friendly"**

Mr JF (July 2004)

**"Many thanks I really appreciate your service and very speedy delivery, I will definitely use you again."**

Mrs MA (July 2004)

**"I have always received very helpful advice from your company when visiting at Orchid shows etc. and am pleased to say that the Automatic Humidification System I bought a number of years ago is still doing a great job."**

Mrs AC (July 2004)

**"Thank you for the fast delivery"**

DS (March 2007)

**"What a surprise. My heater arrived at 07:10 today. I only ordered it yesterday afternoon."**

RH (December 2016)

**"It was very refreshing to find a company, which still has the ethics of service to its customers, so very much in evidence."**

GMW, Hampshire (January 2004)

**"Very impressed by the service. Requested Electronic Thermostat 3.11.05 received on 5.11.05"**

Mr RS (November 2005)

**"What a pleasure it is to buy from you. Spoke to a very courteous lady and to my amazement it arrived today on Cornwall. I shall certainly buy from you again"**

CBC (June 2005)

**"I just wanted to say thank you very much for dealing with my query so promptly and with the minimum of hassle. It is much appreciated"**

MV (January 2007)

## Ordering

"I just wanted to thank you for making a last minute adjustment to my order yesterday. It was delivered a few minutes ago, what an amazing service. I can honestly say that service doesn't get any better than this!"

PG (Mar 2010)
